In mid-February Aura topped out, completing the structural element of the development. That then allowed the brick façade to begin to take shape, revealing how the final product will look. Windows and sliding doors have begun to be installed to the lower and upper levels. Services are almost completely roughed in throughout the development, followed by plasterboard linings and setting. Tiling to bathroom floors began last week, now complete up to level 2.

Following these key activities, the internal fitout follows on. From there, the internal style of the apartments begins to take shape. Kitchen joinery, tiling, timber flooring, fixtures and fittings and appliances begin to be installed over the next several months.

We look forward to reporting next month on the status of your new homes.

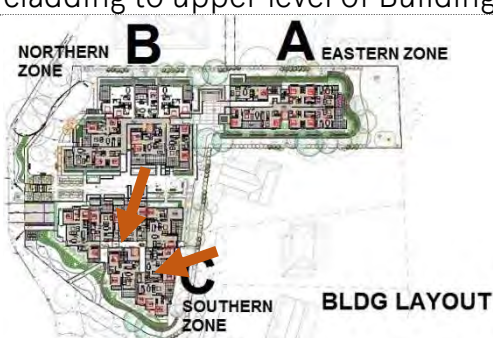

Kind Regards,

The Central Element & HCAP Developments Team
